

Programming Assignment 5

Covers Chapter 13, 16, 18, 19

Programming Projects:

Write a graphical application for computing statistics of a data set. Supply a text field and button for adding floating-point values, and display the current minimum, maximum, and average in a label.

Submission:

1. Must include java source code, and project file
2. Put each exercise into one folder
3. Zip two folders into one file to submit

Late Submission Penalty: 10 points off for each day late.
